

T-Handle T25 Torx Plus® Tamper-Resistant Wrench

AWSGTRP25

Ergonomic soft grip handle provides comfort during repetitive tasks

Features and Benefits

- Delivers superior turning power, and allows maximum pressure to be applied when loosening difficult fasteners with both T and L applications
- Blades constructed from high-strength steel and hardened for durability and use on tamper proof fasteners
- Blade tips are black oxide coated to prevent chipping and to help maintain a secure fastener engagement
- Short blade provides maximum torque for tight quarters, while the long blade promotes quick fastener turning in difficult access situations

CE – Not Required

Country of origin: Spain

AWSGTRP25

Color coded handles identify drive configuration at a glance

Applications

Designed to access Bosch® mass air flow (MAF) sensor screws in various Mercedes®, Volvo® and other European vehicles

Bosch® Mass Air Flow (MAF) Sensor

Specifications

Size	Part no	T-Length, inches	Length, inches
